1. Customer Journey Map

This map represents how a product strategist or analyst interacts with the Doctor appointment App

Stage	Need	Action	Touchpoint	Pain Point	Opportunity
Awareness	Discover an easy way to book doctors	Sees ads, searches app stores, asks friends	Social media, app store, referrals	Uncertainty about app trustworthiness	Build brand trust with reviews, certifications, and demos
Consideration	Explore doctors and app features	Browses profiles, checks reviews, compares options	App UI, doctor profiles, testimonials	Overwhelmed by choices, unclear info	Improve filters, verified doctor badges, clearer info layout
Registration	Create an account quickly and securely	Signs up with email or phone	Sign-up form, OTP/verification page	Long forms or failed OTPs	Offer one-click sign-in, reduce required fields
Booking	Book a convenient appointment	Searches doctor, picks time slot, confirms booking	Booking interface, calendar, payments	Slot unavailability, slow loading, payment issues	Real-time availability, quick booking, multiple payment options
Consultation	Attend a smooth online or in-person visit	Joins video call or goes to clinic	Video module, location info, reminders	Poor call quality, unclear directions	Optimize video tech, share clinic maps & prep instructions
Follow-up	Access prescriptions and book follow-ups	Checks records, books again	Health records, appointment history	Hard to find old data or doctor info	Smart record tagging, "Rebook Doctor" button
Feedback	Share experience easily	Rates doctor, submits feedback	Feedback form, app prompt	Low motivation to leave feedback	Offer rewards for reviews, make feedback 1-click
