Project Design Phase
Solution Architecture

Date	03 AUGUST 2025
Team ID	LTVIP2025TMID56112
Project Name	Doctor Appointment App : Book doctor appointments instantly. Find top doctors, schedule visits or video calls, and manage your health—all in one app
Maximum Marks	4 Marks

Solution Architecture:

Mobile and web apps connect to a backend server that manages user authentication, appointment booking, telemedicine, payments, and health records. Data is securely stored in a cloud database.

- **Mobile & web apps for users and doctors**
- **Backend server with APIs for core functions (booking, auth, notifications)**
- **Secure cloud database for storing users, appointments, and medical data**
- **Integration with payment gateways and video call services**
- **Hosted on scalable cloud infrastructure (AWS/Azure/GCP)**
- **Emphasis on security, privacy, and performance**
