Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	03 AUGUST 2025
Team ID	LTVIP2025TMID56112
Project Name	Doctor Appointment App : Book doctor appointments instantly. Find top doctors, schedule visits or video calls, and manage your health—all in one app.
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-01	User Registration & Authentication	- Sign up via email/phone - Login with password/OTP - Reset password
FR-02	Doctor Profile Management	- Create/edit doctor profile - Add specialization & experience - Set availability slots
FR-03	Search & Filter Doctors	- Search by name/specialty/location - Apply filters (ratings, ava

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-01	**Performance**	The app should load screens within 3 seconds under normal network conditions.
NFR-02	**Scalability**	The system must handle increased user load (up to 1 million users) seamlessly.
NFR-03	**Availability**	The app should be available 99.9% of the time (excluding maintenance windows).
NFR-04	**Security**	Data must be encrypted in transit and at rest (e.g., HTTPS, AES encryption).
NFR-05	**Usability**	The app should be intuitive and usable by non-technical users of all ages.
NFR-06	**Maintainability**	The codebase should follow modular structure for easy maintenance and updates.
NFR-07	**Compatibility**	The app must work across iOS, Android, and major web browsers.
NFR-08	**Reliability**	The system must ensure accurate data syncing and appointment tracking.
NFR-09	**Compliance**	The app must comply with data protection regulations (HIPAA, GDPR).
NFR-10	**Localization**	The system should support multiple languages for wider user accessibility.
